

## **AF-25**

### Foaming Agent

**AF-25** is designed to be a foamer as well as a wetting agent. It has excellent foaming qualities in fresh water, brine waters and acids.

**AF-25** has excellent carrying capabilities of cuttings and particles created during the acidizing process as well as reducing hydrostatic head created by large volumes of fluid.

**AF-25** reduces surface tension, and is ideal when used in conjunction with CO<sub>2</sub> or Nitrogen. Makes excellent foam for sweeps and diversion.

**AF-25** is compatible with most make-up waters, and creates a soft foam which degrades rapidly when exposed to atmospheric conditions.

<b>Specific Gravity:</b>	1.02
<b>Appearance/Odor:</b>	Light Yellow to Amber/Alcohol
<b>Solubility:</b>	Water
<b>pH:</b>	6.5-7.5

*See MSDS*

#### **AF-25 recommended application:**

<u>Application</u>	<u>Amount/1000 gallons</u>
Acidizing	1 – 3 gallons
Sweeps	3 – 5 gallons
Diverter	3 – 5 gallons

**AF-25** is available in 5 gallon pails or 55 gallon drums.
