

CI-360

HCL Acid Corrosion Inhibitor

CI-360 is an acid inhibitor for use in hydrochloric acid solutions. It is highly dispersible in the most common concentrations of hydrochloric acid blends. It was developed for acidizing oil and gas wells.

CI-360 is a low to moderate temperature acid inhibitor that gives excellent protection up to 250 degrees F in 15% HCl Acid without an intensifier.

CI-360 is recommended at a volume of 1 to 10 GPT

The concentration of CI-360 is determined by:

- The type of steel alloy
- Downhole treating temperature
- The acid concentration
- Contact time of acid

Specific Gravity:	.8595
Appearance/Odor:	Light Brown Liquid/Pungent
Solubility:	Acid Dispersible
Charge:	Cationic

See SDS

CI-360 is available in 55 gallon drums, 275 gallon totes, 330 gallon totes, and bulk
