

CPT-440

Coil Pack Treatment

CPT-440 is a water-soluble, oil insoluble corrosion inhibitor. This liquid product is specifically formulated to mitigate all aspects of corrosion.

CPT-440 is a combination of film forming amines, neutralizing amines, surfactants, as well as an oxygen and sulfate scavenger.

CPT-440 is a quaternary amine that attacks the cell membrane of bacteria and is surface active to prevent further growth of biofilms.

Recommended Uses:

CPT-440 is recommended as a corrosion inhibitor and a scavenger. It is one treatment that is specifically formulated as an inhibitor for these systems.

Suggested Treating Methods:

Treating ratios for **CPT-440** vary from 5 to 8 gallons per 10 bbls depending on the type of water used and the temperature of the static fluid.
